Specificity of Proteolysis presents a survey and conclusions on the action or proteinases - enzymes which are cleaving proteins or peptides. The specificity of. Diversity and Specificity of Actions of Slit2 Proteolytic Fragments in Axon Guidance. Kim T. Nguyen Ba-Charvet, Katja Brose, Le Ma, Kuan H. Proteolysis is the breakdown of proteins into smaller polypeptides or amino acids . Uncatalysed . Different enzymes have different specificity for their substrate; trypsin, for example, cleaves the peptide bond after a positively charged residue . Recent studies on the digestion of proteins by the proteolytic enzymes .. The work on the specificity of proteolytic enzymes by Bergmann and his colleagues. proteolytic digest of a whole proteome lysate as the primary analytes instead specificity of the used proteases is therefore crucial, both for the.
